

About Us

BXPlant is a **CDRO partner** that seamlessly integrates **strategic clinical development grounded in a robust R&D bridge**, into traditional CRO services. Our comprehensive suite of services and innovative solutions supports every stage of drug development and clinical research. This includes expert R&D consulting, tailored clinical development strategies, and efficient clinical trial operations.

Business

* M&S; Modeling and Simulation, TPP; Target Product Profile, CDP; Clinical Development Plan, CPL; Clinical Project Lead

R&D Consulting

- **Non-clinical development strategies (domestic & global)**
- Non-clinical study management, data review, and interpretation
- **Translational Research** (from non-clinical to clinical, PK/PD M&S)
- **Support for Regulatory Agency Interactions**

Clinical Strategy

- **Clinical development planning (TPP, CDP development)**
- Dedicated CPL support (project/vendor management etc.)
- **IND/NDA package preparation**
- Gap analysis for clinical research, regulation, and competitive landscapes

Clinical Operation

- **Customized operations** (CR, DM/BS, MW, QA)
- **Regulatory** clinical trials (Phase 1-3, BE)
- **Post-marketing** study (IIT, PMS, OS/NIS)

Global Business

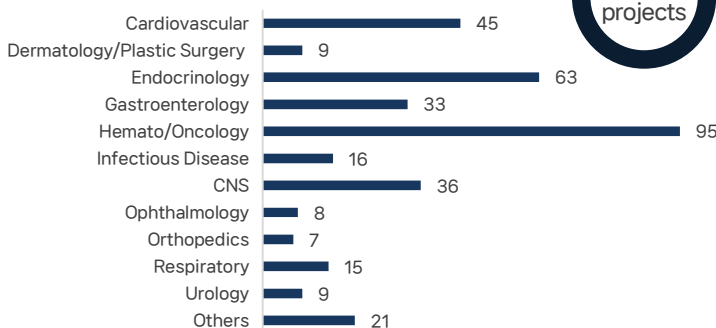

- **Tailored consulting services** for Korean sponsors to expand their clinical development globally and **for international sponsors aiming to enter the Korea Clinical Development market**

Our Strength

- End-to-End Strategy from Nonclinical to Clinical**
 Seamless **nonclinical-to-clinical translation** strategy built on proven expertise
- Experts with 20+ Years of Experience**
 Clinical and development experts from a range of industry backgrounds—including pharma, biotech, and CROs.
- Experts with a Track Record of ~380 Projects**
 Extensive experience across pharmaceuticals, medical devices, and dietary supplements in diverse therapeutic areas.
- Customized Services for Sponsor Needs**
 Leveraging sponsor-side experience, we **manage risks proactively and preemptively**—minimizing delays and maximizing efficiency.

Clinical Trials Service
